

Open Dashboard

Open Dashboard is not a block that can be used in block coding, but it allows you to open a dashboard where you can check how the model used in the extension module is applied.

Dashboard Screen

When you click Open Dashboard, you can see the following screen.

Detailed Features

Power

Turns the selected camera on or off.

Color Register

Adds the color selected from the dropdown option to the list of colors to detect.

Dropdown Options and Input Values

Name	Type	Description	Range / Type
color	Dropdown Option	Selected color	black, red, yellow, green, cyan, blue, magenta, white

Detect

Starts or stops color detection.

You can choose whether to run it only once with the Once button, or continuously with the Continuous button.

Show Result

Displays color detection results on the camera screen.

Color Data

Displays data values based on the selected color.

Dropdown Options and Input Values

Name	Type	Description	Range / Type
color	Dropdown Option	Selected color	black, red, yellow, green, cyan, blue, magenta, white

Blocks

Select Camera

Selects the camera to use for the Color Detection module.

Dropdown Options and Input Values

Name	Type	Description	Range / Type
camera	Dropdown Option	Camera to use	Connected camera list

JavaScript Code

```
// Set a specific camera for color detection (id is an example)
$('ColorDetection*0:camera.deviceId').d =
'feed7de06e4339e1a37c0982453051d5a706fa8c06064bfcf215e77b2dcd8818';
```

Python Code

```
# Set a specific camera for color detection (id is an example)
__('ColorDetection*0:camera.deviceId').d =
'feed7de06e4339e1a37c0982453051d5a706fa8c06064bfcf215e77b2dcd8818'
```

Add Target Color

Adds a color to be detected through color detection.

Dropdown Options and Input Values

Name	Type	Description	Range / Type
color	Dropdown Option	Recognizable color	Black (0), Red (1), Yellow (2), Green (3), Cyan (4), Blue (5), Magenta (6), White (7)

JavaScript Code

```
// Add black (0) to target colors
$('ColorDetection*0:color.register').d = 0;
await $('ColorDetection*0:color.!register').w();

// Add green (3) to target colors
$('ColorDetection*0:color.register').d = 3;
await $('ColorDetection*0:color.!register').w();

// Add white (7) to target colors
$('ColorDetection*0:color.register').d = 7;
await $('ColorDetection*0:color.!register').w();
```

Python Code

```
# Add black (0) to target colors
__('ColorDetection*0:color.register').d = 0
await __('ColorDetection*0:color.!register').w()

# Add green (3) to target colors
__('ColorDetection*0:color.register').d = 3
await __('ColorDetection*0:color.!register').w()

# Add white (7) to target colors
__('ColorDetection*0:color.register').d = 7
await __('ColorDetection*0:color.!register').w()
```

Delete Target Color

Deletes a color to be detected through color detection.

Dropdown Options and Input Values

Name	Type	Description	Range / Type
color	Dropdown Option	Recognizable color	Black (0), Red (1), Yellow (2), Green (3), Cyan (4), Blue (5), Magenta (6), White (7)

JavaScript Code

```
// Delete black (0) from target colors
$('ColorDetection*0:color.delete').d = 0;
await $('ColorDetection*0:color.!delete').w();

// Delete red (1) from target colors
$('ColorDetection*0:color.delete').d = 1;
await $('ColorDetection*0:color.!delete').w();
```

```
// Delete cyan (4) from target colors
$('ColorDetection*0:color.delete').d = 4;
await $('ColorDetection*0:color.!delete').w();
```

Python Code

```
# Delete black (0) from target colors
__('ColorDetection*0:color.delete').d = 0
await __('ColorDetection*0:color.!delete').w()

# Delete red (1) from target colors
__('ColorDetection*0:color.delete').d = 1
await __('ColorDetection*0:color.!delete').w()

# Delete cyan (4) from target colors
__('ColorDetection*0:color.delete').d = 4
await __('ColorDetection*0:color.!delete').w()
```

Set Minimum Area for Color Detection

Sets the minimum area for color detection.

Only areas whose size is greater than or equal to this value will be displayed on the screen.

Dropdown Options and Input Values

Name	Type	Description	Range / Type
area	Input Value	Minimum area for color detection	Real number ≥ 0

JavaScript Code

```
// Set minimum area condition to 50
$('ColorDetection*0:color.area_condition').d = 50;
```

Python Code

```
# Set minimum area condition to 50
__('ColorDetection*0:color.area_condition').d = 50
```

Detect Colors Once

Among recognizable colors, detects the colors currently on the screen and displays areas only once.

JavaScript Code

```
// Detect colors once
$('ColorDetection*0:detect.once').d = 1;
```

Python Code

```
# Detect colors once
__('ColorDetection*0:detect.once').d = 1
```

Detect Colors Continuously

Starts or stops continuous color detection.

When continuous detection starts, it keeps tracking and displaying areas of recognizable colors currently on the screen.

Color Detection 0 : start continuous object detection

✓ start
stop

Among the target colros, continuously detect the color on the screen and display it.

Dropdown Options and Input Values

Name	Type	Description	Range / Type
toggle	Dropdown Option	Color detection	Start (1), Stop (0)

JavaScript Code

```
// Start continuous color detection
$('ColorDetection*0:detect.continuous').d = 1;

// Stop continuous color detection
$('ColorDetection*0:detect.continuous').d = 0;
```

Python Code

```
# Start continuous color detection
__('ColorDetection*0:detect.continuous').d = 1

# Stop continuous color detection
__('ColorDetection*0:detect.continuous').d = 0
```

Show Color Detection Result

Decides whether to display color detection results on the camera screen.

Color Detection 0 : auto result

✓ auto
show
hide

Decide whether to display the result of color detection on the camera screen.

Dropdown Options and Input Values

Name	Type	Description	Range / Type
toggle	Dropdown Option	Show results	Show (1), Hide (0)

JavaScript Code

```
// Show color detection results
$('#ColorDetection*0:display').d = 1;

// Hide color detection results
$('#ColorDetection*0:display').d = 0;
```

Python Code

```
# Show color detection results
__('ColorDetection*0:display').d = 1

# Hide color detection results
__('ColorDetection*0:display').d = 0
```

Color-Related Data

Returns data of the selected color region.

Dropdown Options and Input Values

Name	Type	Description	Range / Type
color	Dropdown Option	Recognizable color	Black (0), Red (1), Yellow (2), Green (3), Cyan (4), Blue (5), Magenta (6), White (7)
axis	Dropdown Option	Coordinate / data type	min_x, max_x, min_y, max_y, width, height, area

JavaScript Code

```
// Red (1) region x coordinate
$('ColorDetection*0:color.x').d[1];

// Red (1) region y coordinate
$('ColorDetection*0:color.y').d[1];

// Red (1) region min x
$('ColorDetection*0:color.min_x').d[1];
```

```
// Red (1) region max x
$('ColorDetection*0:color.max_x').d[1];

// Red (1) region min y
$('ColorDetection*0:color.min_y').d[1];

// Red (1) region max y
$('ColorDetection*0:color.max_y').d[1];

// Red (1) region width
$('ColorDetection*0:color.width').d[1];

// Red (1) region height
$('ColorDetection*0:color.height').d[1];

// Red (1) region area
$('ColorDetection*0:color.area').d[1];
```

Python Code

```
# Red (1) region x coordinate
__('ColorDetection*0:color.x').d[1]

# Red (1) region y coordinate
__('ColorDetection*0:color.y').d[1]

# Red (1) region min x
__('ColorDetection*0:color.min_x').d[1]

# Red (1) region max x
__('ColorDetection*0:color.max_x').d[1]

# Red (1) region min y
```

```

__('ColorDetection*0:color.min_y').d[1]

# Red (1) region max y
__('ColorDetection*0:color.max_y').d[1]

# Red (1) region width
__('ColorDetection*0:color.width').d[1]

# Red (1) region height
__('ColorDetection*0:color.height').d[1]

# Red (1) region area
__('ColorDetection*0:color.area').d[1]

```

Was the ~ Color Detected?

Returns whether the selected color was detected as **True (1) / False (0)**.

Dropdown Options and Input Values

Name	Type	Description	Range / Type
color	Dropdown Option	Recognizable color	Black (0), Red (1), Yellow (2), Green (3), Cyan (4), Blue (5), Magenta (6), White (7)

JavaScript Code

```
// Was red (1) detected?
$('ColorDetection*0:color.area').d[1] >=
$('ColorDetection*0:color.area_condition').d;

// Was blue (5) detected?
$('ColorDetection*0:color.area').d[5] >=
$('ColorDetection*0:color.area_condition').d;
```

Python Code

```
# Was red (1) detected?
__('ColorDetection*0:color.area').d[1] >=
__('ColorDetection*0:color.area_condition').d

# Was blue (5) detected?
__('ColorDetection*0:color.area').d[5] >=
__('ColorDetection*0:color.area_condition').d
```
